

How to Create Your Farmer ID

(A simple guide for farmers)

The Farmer ID is a special number created for every farmer. This ID helps the Government provide benefits quickly and correctly. To create this Farmer ID, States are setting up a **Farmer Registry**, where every farmer can register and claim their land. Please note that Farmer ID is now a mandatory requirement for registration under the PM-KISAN scheme.

To make this easy for all farmers, four simple ways have been created. You can choose whichever method is most convenient for you.

1. Self-Registration by the Farmer

Farmers who use a smartphone can register themselves using the **Farmer Registry mobile app**.

How it works

- **Download the respective State Farmer Registry App**
 - Example: *Uttar Pradesh* → *Farmer Registry UP App*
 - *Madhya Pradesh* → *Farmer Registry MP App*
- **Create your account** in the mobile app by entering Aadhaar Number, mobile number, OTP and basic details.
- Log in with your created credentials.
- **Fetch your land details** by selecting:
 - District, Sub District, Village, Survey Number
- **Confirm and add your land parcels** to your application.
- **Give consent & complete e-Sign** using Aadhaar-based authentication.

Why this is useful

- Simple and easy to use
 - You can complete the entire process at home
 - You can also view other information like crop survey data
 - More services will be added to the app in the future
-

2. Registration Through Intermediaries

If a farmer prefers help from someone trained in digital services, two types of intermediaries can assist:

a. Common Service Centers (CSCs)

- Open the respective State Farmer Registry Portal
- Example for UP: <https://upfr.agristack.gov.in/farmer-registry-up/#/>
- Click on “Login with CSC” and enter CSC credentials.
- Verify the farmer’s Aadhaar and mobile number in the portal.
- Fetch the farmer’s land details by selecting district → sub-district → village → survey number.
- Collect farmer consent & complete e-Sign using Aadhaar-based verification.
- Submit the registration.

b. Local Volunteers (Sahayaks)

- Sahayaks are trained helpers from your village or surrounding area
- Sahayak downloads the respective State Farmer Sahayak App
 - Example: *Uttar Pradesh → Farmer Sahayak UP App*
 - *Madhya Pradesh → Farmer Sahayak MP App*
- Creates an account and logs in using credentials.
- Verifies the farmer’s Aadhaar and mobile number using the mobile app.
- Fetches the farmer’s land details by selecting district → sub-district → village → survey number.
- Takes farmer consent & completes e-Sign through Aadhaar-based verification.
- Submits the Farmer Registry application

Why intermediaries are helpful

- They provide support for farmers who need digital assistance
- They bring the registration process closer to the village
- They help ensure every farmer is included

3. Camp-Based Registration by Government Staff

In many places, the Government will organise **registration camps**. This is especially useful when the registry is first launched.

How camps help farmers

- Camps spread awareness and provide clear information
- Agriculture and Revenue officials are present to help
- Farmers can walk in, get information, and register at one place
- Camps use special apps designed for Government staff or Sahayaks to complete the process

These camps ensure that even farmers who do not use smartphones or CSCs are able to register easily.

4. Registration at Government Front Offices

Farmers can also visit nearby Government offices for registration. These may be:

- Agriculture Department offices
- Block offices
- Village-level or district-level front offices
- Offices of allied departments

How this works

- Trained officials will help enter your details on a Government web portal
- Farmers only need to provide basic details and documents
- This is a good option for farmers who prefer face-to-face help without going to a camp

Approval Process for Farmer ID

Once a farmer submits their details, the system checks the name, land records, and Aadhaar information.

- If the **name match is high**, the State may choose *auto-approval* so the Farmer ID is created quickly.

- If the **name match is low**, the State may send the case to a specific officer or department for verification.
 - Each State can decide the rules for approval, ensuring the Farmer ID is given only to the correct farmer.
-

Summary: How You Can Create Your Farmer ID

You can register for your Farmer ID through **any one** of the four methods:

1. **Self-registration using the mobile app**
2. **Through CSCs or trained Sahayaks**
3. **At Government-run registration camps**
4. **At Government front offices**

These options give every farmer the freedom to choose a method that suits their convenience.

The _____ aim _____ is _____ simple:
Every farmer should be part of the Farmer Registry so that benefits reach the right person at the right time.
